Discover our solar system while exploring the longest trail of its kind on the West Coast, and the only one in Oregon!

Bike, walk, run, or skate along a 4.5-mile section of paved path (9 miles round trip) along the beautiful Willamette River discovering our sun and its planets, even dwarf planet Pluto! Then, escape our solar system and visit our second closest star, Proxima Centauri, and its exoplanet, Proxima b, located at Eugene Science Center.
