

## **2026 Partner Spotlight - Chambers Construction**

Founded in 1955, Chambers Construction is a leading local commercial and industrial general contractor best known for building some of the area's biggest landmarks and the hearts of both downtown Eugene and Springfield. The company specializes in both large and small projects in everything from remodels and renovations to tenant improvements and ground-up new construction. Every day, the company lives out its core purpose of "Building What's Important in People's Lives."

### **Why do you choose to support Eugene Science Center?**

*At a time when there are so many cutbacks happening with our schools, Eugene Science Center offers a tremendous opportunity and FUN for kids to engage and learn things they don't get to in the classroom.*

### **Any memorable moments visiting the center?**

*No visit is complete without a planetarium or laser show – these are a must do!*

### **What are your thoughts about our mission to inspire scientific curiosity and foster critical thinking about the universe and our place in it?**

*Giving kids the opportunity to explore new ideas and concepts and experience science with hands-on engagement opens their minds to new ways of seeing the world and their place in it. It creates the framework for bigger conversations and critical thinking about how things work and why things are or act the way they do. This opportunity is priceless and creates the basis for life-long learning, which is a true gift.*

### **Do you have a favorite exhibit?**

*I have to confess – I'm definitely biased toward the Discovery Room and the Keva Block Station where kids get the chance to build structures. I mean, I work for a construction company after all.*

### **What would you say to someone who is thinking about supporting Eugene Science Center?**

*Eugene Science Center is a special place in our community and offers a unique place to learn for our kids. If you want an easy way to make a difference, this is a great organization doing good work, helping to expand young minds.*
