2026 Partner Spotlight: Hunter Communications

A Hunter Communications Employee Experience:
"There were a lot of cool things for my kids to do at the Eugene Science Center. Honestly, it was really nice to be able to go there with the kids and let them run around for a couple of hours exploring all sorts of different exhibits. It was a nice break as a parent and my kids always had tons of fun exploring and meeting other kids. We'd always try and end our time there by catching one of the planetarium shows which is what my kids remembered most fondly. It was always the big topic around the dinner table and with their friends, which would lead to more play dates at the Science Center."

Mission and Values:
At Hunter Communications, we believe connection is about more than just technology. It's about bringing people together, strengthening communities, and creating opportunities for the places we call home.

As a locally based Oregon company, we're committed to providing fast, reliable, affordable, and secure fiber internet while helping families stay safe online. We believe everyone deserves access to quality internet service, backed by exceptional local customer support.

Beyond connecting homes and businesses, we're passionate about investing in the communities we serve, supporting education, encouraging innovation, and helping create a safer, more connected future for everyone.

We support Eugene Science Center!
At Hunter, we believe investing in our community means investing in its future. Eugene Science Center plays an important role in inspiring young minds, encouraging exploration, and making science accessible, engaging, and fun for families throughout our region.

The value of curiosity:
Every great innovation begins with curiosity. By supporting Eugene Science Center, you're helping give children the opportunity to explore, ask questions, think critically, and discover what's possible.

At Hunter Communications, we believe access to safe, affordable technology and quality educational experiences can open doors and create opportunities that last a lifetime.

When we invest in curious minds today, we're helping build a smarter, safer, and more connected community for tomorrow.
